## Restriction/Election

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-6, drawn to processing of address header for routing, per se, classified in class 370, subclass 392.
  - II. Claim 7, drawn to store and forward, classified in class 370, subclass 428.
  - III. Claims 8-21 drawn to Input or output circuit, per se (i.e., line interface), classified in class 370, subclass 419.
- 2. The inventions are distinct, each from the other because of the following reasons: Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP 806.04, MPEP 808.01). In the instant case the different inventions have different modes of operation, different functions, and they have different effects.
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification because of their recognized divergent subject matter, and the search required for each Group I, Il or III is not required for other Group, restriction for examination purposes as indicated is proper.
